Import Data Through TAFJ Inbox - On Premises

Date Event Streaming is now replaced with TAFJ Inbox receiving the positive confirmation for the status request message. [Click here to read the full story](#) 

Release Highlights

Financial Crime Mitigation

Knowledge Manager » Audit Log

The Audit Log feature allows the bank to,

- Capture the audit events for user access using third-party authentication like Key cloak.
- Stream the information captured in the audit events table into server logs.
- Configure the list of fields to be streamed into the server log from the audit table.
- Use the audit logs for monitoring purposes using Grafana.

The topic related to this feature is given below:

Basics » Accessing the License Log through APIs

Banks can now access the license log in both On-Prem and SaaS environments through the Get Trusted Beneficiaries API. Also, the log details included are License Expiry Date, Days to Expiry and License Status.

The topic related to this feature is given below:

Data Loader » Import Data Through TAFJ Inbox - On Premises

Date Event Streaming is now replaced with TAFJ Inbox. TAFJ Inbox feature is enhanced to allow many data files to be imported into FCM using a single batch file. It works with both the on-premises FCM and the SaaS platform.

The topic related to this feature is given below:
