TEMENOS PAYMENTS

Regenerating pacs.002 ACCC on Receiving and Processing admi.002 Reject

Temenos payments can now regenerate the final confirmation message (pacs.002) after receiving the rejection from the clearing and update the audit trail of the transaction on receiving the positive confirmation for the status request message. Click here to read the full story \mathscr{O}

LOCAL CLEARING

Outward FI - FI Credit Transfers COV

This functionality enables banks to manage the business reject notification response (pacs.002) for the incoming pacs.009 COV message in TPH. To support the Hong Kong Clearing House Automated Transfer System (HK_CHATS), payment clearing for the Clearing House Automated Transfer System MX (CHATSMX), new configurations, mappings and process flows have been released to process the outgoing pacs.009 Cov payment messages. Click here to read the full story &

Outward Return Customer Credit Transfers

This functionality enables banks to initiate a return payment against the original customer credit transfer received. The pacs.004 message will be processed manually from the repair queue and automatically in TPH. To support the Hong Kong Clearing House Automated Transfer System (HK_CHATS), payment clearing for the Clearing House Automated Transfer System MX (CHATSMX), new configurations, mappings and process flows have been released to process the outward (sending of the pacs.004 payment message) and inward (pacs.002 and admi.002 response messages) files. Click here to read the full story

Outward Return FI - FI Credit Transfers COV

This functionality enables banks to manage the acceptance (pacs.002), functional reject (pacs.002) and technical reject (admi.002) notification responses for the Real Time Gross Settlement (RTGS) outward return payment (pacs.004) for an incoming pacs.009 or pacs.009cov message, in TPH. To support the Hong Kong Clearing House Automated Transfer System (HK_CHATS), payment clearing for the Clearing House Automated Transfer System MX (CHATSMX), new configurations, mappings and process flows have been released to process the outward return payment (pacs.004) for an incoming pacs.009 or pacs.009cov message. Click here to read the full story &

Inward Return Customer Credit Transfers

This functionality enables banks to manage Real Time Gross Settlement (RTGS) inward return customer credit transfers (pacs.004), in TPH. To support the Hong Kong Clearing House Automated Transfer System (HK_CHATS), payment clearing for the Clearing House Automated Transfer System MX (CHATSMX), new configurations, mappings and process flows have been released to process the inward pacs.004 files. Click here to read the full story &

Release Highlights

Payments

Temenos Payments » Regenerating Final Confirmation Message on Receiving and Processing Clearing Reject

Temenos Payments can now:

- Regenerate the final confirmation message (pacs.002) after receiving the rejection from the clearing. The accounting entries of the transaction are not reversed when the clearing rejects the final confirmation.
- Receive and process a positive confirmation message for the payment status request (pacs.028).

The topics related to this feature are given below:

Regenerating pacs.002 ACCC on Receiving and Processing admi.002 Reject

Receiving Reject for Final Confirmation Message From Clearing

Payments » Processing Technical Acknowledgement Messages

Certain RtP clearings send technical acknowledgments for RtP messages received from participants and expect the participants to send technical acknowledgement for the RtP messages received from clearing. So, the RtP module is enhanced to receive and process negative and positive technical acknowledgement messages from clearing. In addition, RtP module can also send positive technical acknowledgement message to clearing.

The topics related to this feature are given below:

RtP Interfaces and Message Standards

RtP Scheme Manager

Payment Initiation » Fetching Senders Correspondent Bank Account Number using Payment Simulation

Payment Order can now store the senders correspondent bank account number in addition to existing simulated values such as fees, charges, exchange rate, and value date returned from Temenos Payments.

The topics related to this feature are given below:

Senders Correspondent Account Number - Payment Simulation

Senders Correspondent Account Number - Transparency
Check

Storing Senders Correspondent Account Number

European Clearings
